Transplanter

Job Summary

Ashland Greenhouses has been known for locally grown, region specific plants since 1906. We grow 100% of the plant starts we sell. All of our plants are selected to do well in our unique climate. We are open to the public and serve individual gardeners, landscapers, and businesses. We also ship wholesale orders to independent garden centers, nurseries, and flower shops.

The Transplanter's main objective is to work with our transplanting machine, planting small plants, inserting labels and counting the number of plants planted. This is a fast paced, repetitive job. Accuracy and quality control are important. Some transplanters will hand plant without the machine. Other duties include cleaning the transplanting machine, the area around the machine, transplanting areas, and other minor duties.

Positions are seasonal and the compensation is minimum wage.

Job Responsibilities

While working, a Transplanter's responsibilities will include:

- Lift up to 10 lbs. repeatedly over an 8-hour day from waist to head level and occasionally lift up to 30lbs from just below the waist to shoulder level
- Standing for an 8 hour day
- Operating an electric cart (often with a trailer) safely
- Working quickly and efficiently to complete planting tasks
- Accurately use addition and subtraction to record numbers planted

Skills

Some skills essential for the position are:

- Ability to work cooperatively with the production crew
- Ability to tolerate working outdoors in cold and hot conditions, loud noise, wind, and dust
- Willingness to work variable seasonal hours. January-February ranging from 10-25+ hours a week, March-May ranging from 25-40+
